Why TVCS?

Academic Rigor

Grades TK-5 are the critical years where students gain the foundation in all academic subjects for optimal success in their future learning. At TVCS, the vast degree of state standards are methodically and thematically taught in a strategic manner throughout the year. This academic rigor is also emphasized within and throughout the school week with integrated curriculum in Visual Arts, Performing Arts, Physical Education, and Science Lab.

Learning and Development

These instrumental elementary years are where students progress from letter sound isolation to decoding and fluency, with a strong emphasis on reading comprehension. All teachers are certified in the “Science of Reading” which is based on scientific research prioritizing phonemic awareness, phonics, fluency, vocabulary, and comprehension. Math is a systematic approach from one-to-one correspondence to multi-step word problems also requiring the ability to comprehend successfully.

Science and the Arts

At TVCS, we have dedicated faculty that work with our students on a weekly basis. Our Elementary students love performing hands-on lab experiments in our Science lab. In Music class, they learn music theory, methodology, and are introduced to instruments. All students are also given opportunities to be creatively expressive within our Masters of Art curriculum in our Visual Arts program. The time spent in Performing Arts is designed to create a sincere love of music and performance through the appreciation and participation of a successful musical experience.
